

Accelerator Modules for XFEL

Construction Module Type III

Module 5 in the TTF-Tunnel

Cold frequency tuner

Technical Data:	
Length	12,2m
Diameter	965,2mm
Weight total	7,8 t
Weight Coldmass	2,7 t
Cavities	8
Quadrupole Doublets	1

- Four C-shaped stainless steel elements clamp a titanium pad welded to the helium tank.
- Rolling needles reduce drastically the longitudinal friction
- Cavities are independent from the elongation and contraction of the HeGRP.
- Lateral and vertical position are defined by reference screws
- Longitudinal position can be fixed by the use of an Invar rod

Module Assembly

Cavity string connected

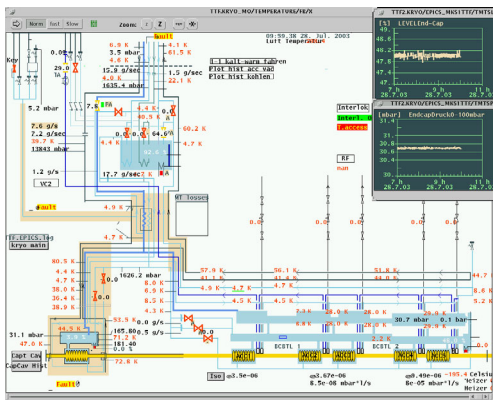

Cavity string with coldmass in the cantilever

Vacuum vessel sliding over coldmass

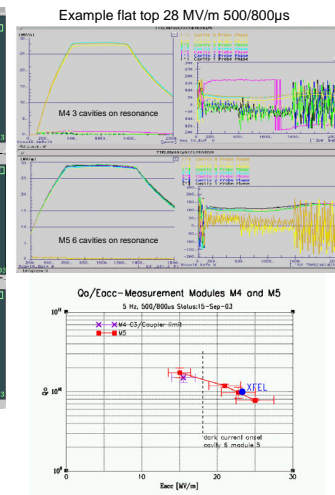

Operational Experience and first Results at TTF

Designed, estimated and measured static cryo-loads TTF-modules in TTF-Linac

Status: 15-Sep-03 R.Lange-MKS1-

Module	40/80 K [W]			4.3K [W]			2 K [W]			Notes
	Design	Estim.	Meas.	Design	Estim.	Meas.	Design	Estim.	Meas.	
Module 4	115.0	76.8	74	21.0	13.9	13.5	4.2	2.8	<3.5	1 end-cap
Module 5	115.0	76.8	74	21.0	13.9	13.0	4.2	2.8	<3.5	1 end-cap

Average Gradient in M4 > 25 MV/m

Average Gradient in M5 > 28 MV/m
